FAST-12T

Radar Speed Trailer

Product Applications

The FAST-12T Radar Speed Display Trailer was designed for residential street and corporate campus-type applications where speeding is a problem. While it may be light in weight, it is built to the same tough industrial standards as its bigger brothers. Easily towed with a passenger vehicle, the trailer can be repositioned throughout a community's streets for maximum effectiveness.

This trailer-mounted radar display is accurate within one mile per hour and easily read at a glance. The 12" high, full-matrix LED characters alert drivers of their speed from up to 750 feet away. Optional violator alerts help capture drivers' attention and inform them of their high speed.

Features and Benefits

- High-intensity 12" radar speed display calms traffic on roads with posted speeds 45 mph or less
- Versatile power options including hardwire (AC) and solar/battery (DC) combinations
- 12" speed digits visible up to 750 feet away
- "YOUR SPEED" static sign plaque mounts to top-of-radar speed display enclosure
